

on-site training for your maintenance  
and fabrication craftsmen

## Training Services available...

Training is tailored to the customer's needs in the following areas:

- Safety
- Welder Certification
- Welding Procedures
- Maintenance Welding
- Tool and Die Repair
- Welding Processes
- Structural and Pipe Welding

"Rick was an excellent instructor and facilitator in getting our maintenance department compliant with basic welding practices and code. He was very diligent with the training and insured all the basics were met and the crew understood what it took to make a good, compliant weld. Rick also was instrumental in establishing the correct weld procedures and welder certifications were obtained so that we could be compliant with our welding."

*-Matt Hanson, Maintenance Manager, Alliant Energy, Sutherland Generation Station*

"You customized our training to fit our company's exact needs, and adjusted the training schedule to accommodate our back shifts. You were very good at assessing the skill level of our craftsmen and addressing their needs. Welding Training Solutions exceeded our expectations at 3M Company."

*-Rick Leavengood, Maintenance Team Advisor  
3M Company*

## What our customers say about us . . .

"I tried to convince my boss to go more local for welding training. I never thought having someone so far away come to New Jersey to do welding training would work to our benefit. BOY WAS I WRONG. Having WTS come on site in this environment worked wonders. The knowledge and experiences that were shared with all levels was spot on. I have met many trainers in my time, and Rick was the best I have come across! I learned one thing – you get what you pay for and it was worth EVERY PENNY!"

*-Charles Henning, First Line Leader, Fixed Equipment, Infinium USA, Bayway Refinery*

"We were pleased with the services you provided for our welding training and well satisfied with the way you managed and taught our employees."

*-Dale Wiley, Coordinator of Learning Opportunities  
Johnson Machine Works*

236 72nd Avenue  
Monroe, LA 50170

## What are the benefits?

Safety training will help bring you into **OSHA compliance** and prevent costly accidents

**Welder qualification** training will bring your operators into compliance with appropriate welding codes

**On-site** training eliminates lost time and expense due to travel

Flexible scheduling allows training on any work shift to maintain floor coverage

Customized training gives you exactly what you need in the shortest possible time

Hands-on training gives individual "over the shoulder" instruction for specific skills development

*"Training isn't expensive... it's priceless!"*

on-site training for your maintenance and fabrication craftsmen
